## EXPERIENCE

- **My Portfolio** I created a personalized portfolio website using HTML, CSS, and JavaScript. The design is based on my custom [Figma theme](#). You can view the live website [here](#), and the code is available on [GitHub](#).
- **Responsive e-commerce Website front-end** I've created a responsive e-commerce front-end using HTML/CSS, providing an optimal viewing and interaction experience across devices. Its adaptive design enhances accessibility and engagement, with a clean and intuitive user interface for a dynamic shopping experience. - [git link](#).
- **Project Light Your Desktop Assistant** This Python project performs various desktop tasks like opening applications, providing the current time, answering computational questions, and playing songs upon request - [git link](#).
- **MySQL Databases Manipulating** This Python program has been developed to allow users to perform multiple operations on a MySQL database. The program establishes a connection with the MySQL server and presents users with a menu-driven interface to execute various tasks - [git link](#).
